SUMMARY

- Results-driven Software Engineer with 3+ years of full-stack development experience (Next.js, NestJS, Node.js, MongoDB, PostgreSQL) and with 2+ years of hands-on DevOps/Cloud expertise architecting secure, highly available AWS environments.
- Skilled in provisioning cloud infrastructure with Terraform and Packer, and automating deployments via Docker and Kubernetes.
- Experienced in RESTful API design, AI-powered feature development (OpenAI API, vector similarity search with pg-vector), and hardening network security via custom VPCs, IAM, and SSM.

EXPERIENCE

Full Stack Software Engineer — Nexium

Jun 2025 – Jan 2026

- AI Recipe Generator:** Architected a secure, single-page MERN application integrating LLM recipe generation and token-based authentication to streamline custom meal discovery.
- Blog Summariser:** Engineered an AI-powered, bilingual blog summarization tool utilizing web scraping and LLM integration for rapid content consumption.

DevOps & Cloud Engineer — Secure Two-Tier Architecture Deployment (AWS)

- Provisioned secure, auto-scaling AWS environments using Terraform and Packer, integrating custom VPCs, NAT Gateways, ALBs, and CloudWatch alarms.
- Deployed applications using Docker and Kubernetes, configuring Persistent Volumes and Horizontal Pod Autoscaling (HPA) for high availability; deployed a live WordPress app separating EC2 web tier from isolated RDS database tier, hardened via IAM roles and SSM.

EDUCATION

BS Software Engineer (CGPA: 2.58)

Aug 2022 – Jun 2026

FAST – National University of Computer and Emerging Sciences

PROJECTS

Projectify

[Next.js, Node.js, PostgreSQL, Cohere AI, Pinecone, Socket.IO, Cloudflare R2, Docker]

- Architected a multi-tenant FYP management ecosystem** with dedicated portals for 4 user roles, streamlining group matching, panel evaluations, hardware resource approval flows, and automated meeting reminder CRON jobs.
- Engineered an AI-backed plagiarism & feasibility engine** that parses PDF/DOCX proposals, generates 1024-dim vector embeddings via Cohere AI, and performs cosine similarity search via Pinecone to block duplicate project ideas.
- Implemented real-time encrypted messaging & containerized CI/CD** utilizing Socket.IO with Redis adapters for scalable web sockets, Cloudflare R2 for asset storage, and Nixpacks/Docker on Railway for continuous automated deployment.

PatchPilot

[Next.js, FastAPI, LangGraph, WebSockets, Python]

- Autonomous DevOps AI agent that intercepts failed CI/CD pipelines, analyzes error logs, surgically patches broken code using LLMs, and opens automated pull requests while streaming real-time reasoning to a live dashboard.

NovaHire

[Next.js, Node.js/Express, Python, MongoDB, RabbitMQ, spaCy, Local GenAI]

- Engineered an asynchronous microservices platform with a Node.js API gateway and RabbitMQ, powering a secure dual-portal frontend with real-time candidate tracking and privacy-first resume scoring (spaCy, local GenAI).

AWS Infrastructure as Code Automation

[Terraform, AWS VPC, EC2, CloudWatch]

- Architected a custom VPC (10.0.0.0/16) with public/private subnets, configured ASG and ALB with CloudWatch-driven scaling, and secured Terraform state via encrypted S3 with DynamoDB locking.

TalentFlow AI

[Next.js 14, PostgreSQL, Prisma, OpenAI GPT-4o, Qdrant, n8n, Apify, Resend]

- Autonomous AI recruitment pipeline** that sources candidates from LinkedIn, Upwork, and Indeed via Apify scraping, parses resumes through Affinda, and computes semantic JD-to-candidate match scores using OpenAI Embeddings and Qdrant vector database.
- End-to-end screening without human intervention** conducts GPT-4o-powered async skill assessments and interviews, computes weighted composite scores, and delivers AI-ranked candidates with generated summaries and verdicts to a real-time HR dashboard

SKILLS

- Cloud & IaC:** AWS (VPC, EC2, S3, RDS, ALB, ASG, IAM, SSM, IAM/MFA, Security Groups, Subnetting), Terraform, Packer
- Containers & Orchestration:** Docker, Docker Compose, Kubernetes, HPA, Persistent Volumes/PVC
- Backend & Databases:** Node.js, Express, NestJS, MySQL, PostgreSQL, MongoDB
- Frontend:** React, Next.js, HTML/CSS, Bootstrap, JavaScript, TypeScript
- DevOps & Security:** Linux, Nginx, Apache, CI/CD, Bash, Git, GitHub
- AI Tools:** Co-Pilot, Cursor, Antigravity, Codex, Claude Code, Gemini CLI

LEADERSHIP

- Team Lead in multiple academic and personal projects.
